

# THE POWER OF WATER

AQUATREND

*The complete water workout station*

The Aquatrend Water Workout Station™ takes advantage of the healthy properties of the aquatic environment. You can effectively perform cardio, strength training, and flexibility exercises - all while the buoyancy of the water protects your joints. Lightweight yet durable, the compact, easy to install Aquatrend is perfect for anyone who wants to workout without the sweat.

AQUATREND<sup>®</sup>

## Get a Total Body Workout - No Sweat!

The Aquatrend Water Workout Station™ affords a user-friendly mode of exercise in an extremely low-impact environment. It provides for total body aquatic exercise in one convenient place. Get to know the Aquatrend and its many advantages.

The Aquatrend Water Workout Station is constructed of marine-grade stainless steel for durability. Stanchion-anchor installation gives stability and security. Weighing just 37 lbs, the Aquatrend is easy to install or remove at a moment's notice. When the station is in the pool, the seat folds up and out of the way where it won't interfere with other aquatic activities.

- Lightweight and compact
- Easy to use
- Effective exercise for all ages
- Provides a low-impact workout
- Increase strength and flexibility
- Works every muscle group
- Manufactured in the U.S.A.
- Get more use from your pool!

Almost Anywhere There's a Pool!  
Any fitness and rehabilitation facility with a pool can offer the Aquatrend and aquatic workout program, and where space allows, multiple stations in each pool. Because a regular program of aquatic training is easy, fun and really COOL, the Aquatrend Water Workout Station™ is great for spas, health clubs, rehabilitation centers, training camps...any swimming pool on the planet!
